

# BLUE WATERS

SUSTAINED PETASCALE COMPUTING

November 13, 2017

## *Promoting Reusable Software: Webinars and Publications*

Scott Lathrop, Technical Program Manager for Education  
[lathrop@illinois.edu](mailto:lathrop@illinois.edu)

GREAT LAKES CONSORTIUM  
FOR PETASCALE COMPUTATION

**NCSA / IBM  
CONFIDENTIAL**

Use, reproduction, or disclosure is subject to the restrictions as stated in the "IBM Agreement for Exchange of Confidential Information – Blue Waters" as documented in the "IBM Statement of Work for Blue Waters System Prepared for the National Center for Supercomputing Applications (NCSA)"

## The Challenge!

The breadth of available options is vast, and members of the community want to understand what software to apply to advance their research and education.

We are here to engage you in discussions about how we can best convey the wealth of options available to the community.

And we welcome and need your involvement!

# Webinars

Blue Waters is offering an ongoing series of webinars covering the following topics:

- Petascale Application Improvement Discovery
- Scientific Software Ecosystems
- Scientific Visualization
- Scientific Workflows
- Software Engineering
- Workforce Development and Inclusion

We welcome submissions of topics on these and other petascale related topics to help advance discovery.

<https://bluewaters.ncsa.illinois.edu/webinars>

Webinars are offered throughout the year.

Registration is required so that we may track participation, and free of charge.

Participants may view the webinars via YouTube and pose questions to the presenters via Slack.

All sessions are recorded and made available via YouTube.

**We welcome submissions of topics on these and other petascale related topics to help advance discovery.**

<https://bluewaters.ncsa.illinois.edu/webinars>

# Publishing Articles

Special issue on **Reusable Software** scheduled for  
Computing in Science and Engineering (CiSE)

<https://www.computer.org/cise/>

**Letter of intent with abstract deadline:** April 2, 2018

**Full paper submission deadline:** July 2, 2018

**Publication:** March/April 2019

**Guest editors:** Michael Folk (HDF Group), Daniel S. Katz (University of Illinois at Urbana-Champaign), Scott Lathrop (National Center for Supercomputing Applications), Lois Curfman McInnes (Argonne National Laboratory), and Andy Ray Terrel (NumFOCUS)

## Goal:

Examine the state of reusable software, inform the community of the excellent resources available to advance research and education goals, and inform future directions for creating reusable software that is responsive to community needs for advancing discovery.

Active community participation is critical to improving, promoting, and expanding the use of reusable software.

We welcome and encourage submissions from the international community, including application scientists, software developers, and stakeholders.

## Topics of interest:

- state-of-the-art
- how reusable software can advance discovery
- lessons learned
- developing and applying reusable software
- efforts in interoperability and community policies
- effective methods for addressing user requirements
- case studies that can be generalized
- strategies to address emerging technologies including extreme-scale computing
- collaborations among government, industry, and academia

## Submissions Guidelines

Letters of intent with a one page abstract are requested in advance of full papers.

Contact the guest editors at [cise2-2019@computer.org](mailto:cise2-2019@computer.org) to ask whether your topic is suited for the special issue.

Please see the [CiSE-specific author guidelines](#) and the [general author guidelines](#).

Please submit electronically through [ScholarOne Manuscripts](#), selecting this special-issue option.

## Questions?

Contact the guest editors at [cise2-2019@computer.org](mailto:cise2-2019@computer.org).

# Publishing Articles

Special issue on **Reusable Software** scheduled for
